

The **SYNCHRONIZED SOLUTION** that may
END the INHUMANITY of ABJECT Homelessness
in **THEIR “LIFE-TIME” ...**

(1) HUMAN DIGNITY as they are NOW.

Contrast the Black with the White lettering for impact:

All Abject **homeless** are not cut from the same cloth. They **are not all criminals or lazy parasites** as many believe. Some are there because of the **failure of community policies to provide** humane assistance when they suffer a crisis or loss in their lives that “break” them. Others suffer from PTSD that comes from the shock of military traumas that leave them fearful of being trapped behind walls where they cannot see danger coming.

A Large part of these Abject Homeless suffer from **another kind of PTSD** that comes from a life-time of being misunderstood, maligned, marginalized and unemployable simply because they think and process differently than the typical majority. This **genetic core** of who they are is **not** a defect or “disability” to be corrected, but a **diversity** that, when correctly developed, is becomes an **asset** to the community. There are those who suffer from a combination of the above.

And then there are those who are simply trouble-makers and a **danger** to the public as well as the homeless communities. **ALL** deserve **Basic Human Dignity** and **appropriate accommodations**, just as the public deserves protection from those who would harm them or deprive them of their safety and security.

Currently they are ALL being Punished equally for simply trying to stay alive **until tomorrow**. **Law Enforcement** needs to **update** their policies and practices to assist those who are trying to do “the right thing” and **limit punitive policies and practices** to appropriate and constructive consequences. **Also, instead of random, disruptive & mentally crippling “evictions,” redirect** all the abject homeless to appropriate **“waiting rooms”** until **“appropriate transitional housing”** becomes available.

needed, with common

The **path on the other side** of the canal goes along new neighborhood construction and, again, **can be monitored**. This means that not only can the neighbors feel safe, but the homeless may safely leave their encampments without fear that their life-saving possessions and documents will be “swept” by law enforcement or stolen by fellow homeless. From here, they may **apply for the shelter/program** that most appropriately fit their needs, capacities and desired future.

This site is also **unavailable to neighborhoods** across a steep ravine encasing a tributary of the Sacramento River. The **behavior** of campers can also be more easily monitored and assessed. If **complaints** of violence or theft are reported, the

campers may be relocated to the **more remote** location of Mercy Hill, behavioral remediation programs, or jail, as indicated.
